

DEMO STAFF REPORT — Example Residential Parking Permit Program

Date: 2026-03-03

Summary

DEMO STAFF REPORT. Subject: Example Residential Parking Permit Program. Meeting: Demo City Council, March 10, 2026. Summary: Demo staff received recurring comments about evening on-street parking congestion along Sample Avenue and adjacent demo streets. This report evaluates three parking management options and recommends a residential permit program with a 60-day education period.

Options Considered

Options considered. Option 1: time-limited parking signage only. Option 2: a residential parking permit program in designated zones. Option 3: no change. Demo staff observed that signage alone does not prioritize residents, while a permit program can be enforced consistently. The demo parking enforcement approach would begin with warnings during an education period.

Fiscal Impact

Fiscal impact. Estimated first-year signage and permit printing cost: \$4,321.00 (placeholder amount — demo data). Permit fees are expected to offset a portion of administration costs. Staff recommendation: adopt the Example Residential Parking Permit Program by sample resolution DEMO-RES-2026-04.
