

## DEMO STUDY — Demo Parkway Corridor Transportation Study

Date: 2025-11-18

---

### Executive Summary

DEMO CORRIDOR STUDY. Prepared by Example Engineering Associates (fictional). This sample study evaluates traffic operations and traffic safety along Demo Parkway. Key finding: the Demo Parkway and Sample Avenue intersection operates at a poor level of service during the evening peak (demo finding).

## Safety Analysis

Traffic safety analysis. The demo crash review identified rear-end collisions as the most common crash type near Sample Avenue. Recommended countermeasures: a traffic signal, high-visibility crosswalks, and a pedestrian refuge island near the school walking route.

## Recommendations

Recommendations. Short term: restripe crosswalks and add speed feedback signs. Medium term: install a traffic signal at Demo Parkway and Sample Avenue. Long term: widen Demo Parkway to include a multi-use trail. Estimated cost: \$3,210,000.00 (placeholder amount — demo data).
